

Phone Based Administration for IP Office Partner/Quick/Basic Modes

Many of the system settings can be programmed from extensions on the system if they are an Avaya phone. The range of features programmable may also depend on the phone type. The following phone types can be used: ETR18D, ETR34D, M7324, M7310, T7316E, T7316, 1408, 1416, 9504 and 9508.

The type of programming is divided into three categories:

System Administration

- Refers to the system programming that can only be done by the first two extensions in the system.

Centralized Programming

- Refers to the programming of other user extensions that can only be done by the first two extensions in the system.

Telephone Programming

- Refers to the programming that an extension user can do of their own settings.

Category	Setting	Access Type	
System Settings	System Locale	System Administration	—
	System Language	System Administration	—
	System Mode	System Administration	—
	Default Numbering	System Administration	#734
