

## **Instructions for changing TCP/IP V4 settings in Windows 7 to match the IP Office Partner Edition KSU**

Go to start  
control panel  
network and internet  
network and sharing center  
then on left side of screen click change adapter settings  
highlight (click once on) local area connection  
then in the blue bar above click on change settings of this connection  
next highlight (click once on) Internet Protocol ver. 4 (TCP/IP V4)  
then click properties  
under the general tab click the check box beside “use the following IP address”  
then enter the following values:

IP address 192.168.42.203  
Subnet mask 255.255.255.0  
Default gateway 192.168.42.1

Then click OK

### **To reset to original settings navigate back to start**

control panel  
network and internet  
network and sharing center  
then on left side of screen click change adapter settings  
highlight (click once on) local area connection  
then in the blue bar above click on change settings of this connection  
next highlight (click once on) Internet Protocol ver. 4 (TCP/IP V4)  
then click properties  
under the general tab click the check box beside “obtain an IP address automatically”  
then click OK.
