

Avaya IP Office Release 9.1 Install Info

WARNING: Installing Release 9.1 on PCS14 and lower KSU's

This is what you must do:

On PCS 14 or lower KSU's, you must first install Release 9.0 and then upgrade the KSU to Release 9.1

Care should be taken to ensure that no calls are made before the upgrade to Release 9.1, otherwise the system will require an 9.1 upgrade license despite being "new".

The PCS of the control unit is printed on the label on the back of the control unit.

If you do not follow this procedure, the KSU will not work.
