

How to make outgoing calls with different CO Lines via Dial Access Code.

Create 4 Shortcodes like these below.
The Line Group ID's here are just examples.

The image shows two identical screenshots of a 'Short Code' configuration form, each with yellow callout boxes explaining the fields.

Top Screenshot (Dial 6 Access Code):

- Code:** 6N; (Callout: Dial 6 Access Code)
- Feature:** Dial
- Telephone Number:** N (Callout: Just put an N here...)
- Line Group Id:** 0 (Callout: Uses this Outgoing Group ID)
- Locale:** (empty dropdown)
- Force Account Code:** ☐

Bottom Screenshot (Dial 7 Access Code):

- Code:** 7N; (Callout: Dial 7 Access Code)
- Feature:** Dial
- Telephone Number:** N (Callout: Just put an N here...)
- Line Group Id:** 1 (Callout: Uses this Outgoing Group ID)
- Locale:** (empty dropdown)
- Force Account Code:** ☐

Assign CO Lines to different Outgoing Group ID's in the Line Settings of the Manager program.

When you dial the associated Access Code, you will pick CO Lines from that group.

Dial 8 Access Code
