Hotline Dial Short Code for Analog Stations

Telquest Tech Support

To dial another extension in the system:

Code	?D
Feature	DialExtn
Telephone Number	The Extension Number to be dialed

To pick an **Analog Outside Line** and get dial tone (without dialing 9) used by a Fax, Credit, etc...

Code	?D
Feature	Dial
Telephone Number	Leave this blank
Line Group ID	Set this to the Outgoing Line Group you want to go out on.

If you are using **T1 or PRI** service:

To pick a **Digital Outside Line/Channel** (without dialing 9) used by a Fax, Credit, etc...

Code	?D
Feature	Dial
Telephone Number	Leave this blank
Line Group ID	Set this to 50:Main (this is the ARS see below)

Operation:

Just raise the handset and you will get dial tone from the Outside Line.

If you are using ARS 50:Main then you need to turn on the Secondary Dial Tone feature:

This will deliver a Dial Tone when the handset is raised.
