## Short Codes to Turn the Message Waiting Light On and Off

### Telquest tech Support

You can use a different Short Code if you want to...

To turn it On

The screenshot shows the Telquest interface for configuring short code \*72: Display Msg. The interface has a blue header bar with the text '\*72: Display Msg' on the right. Below the header is a 'Short Code' tab. The form contains the following fields:

Code	*72
Feature	Display Msg
Telephone Number	N"; Msgs=1"
Line Group Id	0
Locale	
Force Account Code	<input type="checkbox"/>

To turn it Off

The screenshot shows the Telquest interface for configuring short code \*73: Display Msg. The interface has a blue header bar with the text '\*73: Display Msg' on the right. Below the header is a 'Short Code' tab. The form contains the following fields:

Code	*73
Feature	Display Msg
Telephone Number	N"; Msgs=0"
Line Group Id	0
Locale	
Force Account Code	<input type="checkbox"/>
