Edit...
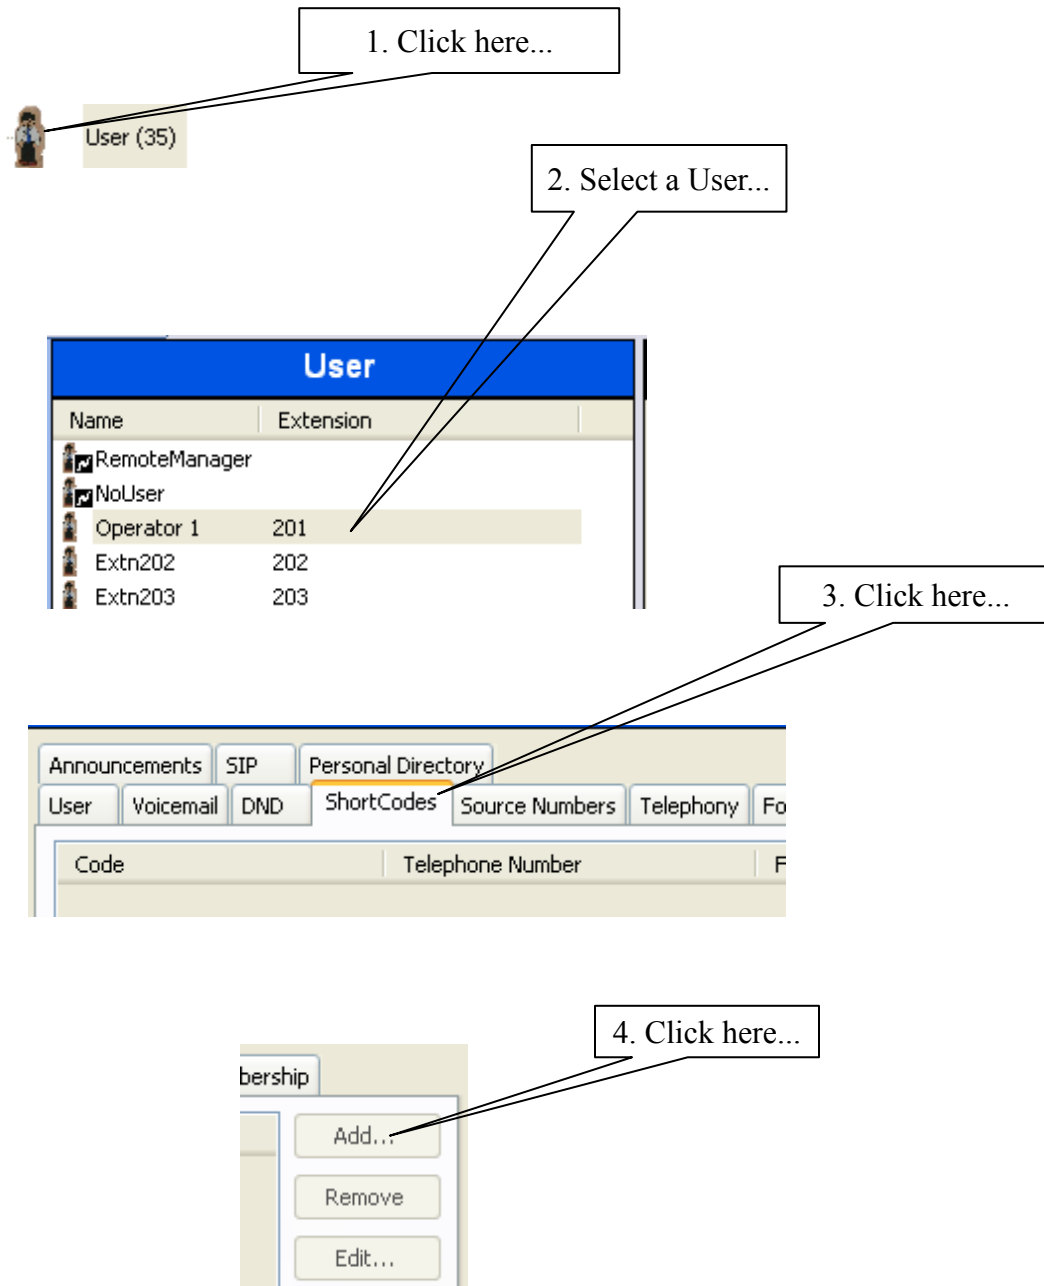

Enter these values.
Change the number after the S to the Caller ID that you want to send.

N=Number Dialed   S=Send
2122351234 is the Caller ID that will be sent

New Short Code

Code	**911**
Feature	**Dial**
Telephone Number	**NS2122351234**
Line Group Id	**0**
Locale	
Force Account Code	☐

The Line Group of the PRI or SIP

NOTE: Yours may be different...

In this example, outgoing calls made from Extn 201 will send a Caller ID of 212 235-1234.

Note:
Your PRI or SIP service provider will usually only allow you to send numbers they have issued to you.

These will be your DID Numbers.

If you try to send a number that is not yours, the call will fail and you will hear a steady tone.
