

Avaya IP Office Essential Edition Extension to Send a Specific CID with PRI & SIP Telquest Tech Support

If you always dial an 11 digit number
(Example. 12122351234)
Then you can use 9XXXXXXXXXXXX
This will send the call out faster...
Otherwise, use 9N;

Enter these values.
Change the number after the S to the
Caller ID that you want to send.

N=Number Dialed S=Send
2122351234 is the Caller ID that will be sent

New Short Code

Code	9N;
Feature	Dial
Telephone Number	NS2122351234
Line Group Id	0
Locale	
Force Account Code	<input type="checkbox"/>

The Line Group of the PRI or SIP
NOTE: Yours may be different...

In this example, outgoing calls made from Extn 201 will send a Caller ID of 212 235-1234.

Note:

Your PRI or SIP service provider will usually only allow you to send numbers they have issued to you.

These will be your DID Numbers.

If you try to send a number that is not yours, the call will fail and you will hear a steady tone.
