Edit... Remove Add... Remove

Analog Extension 207 has been Programed for Paging Speaker

Add all the extensions that you want to receive the All Page or Page Zone

Note: 3rd Party SIP Devices will not get the Page Announcement

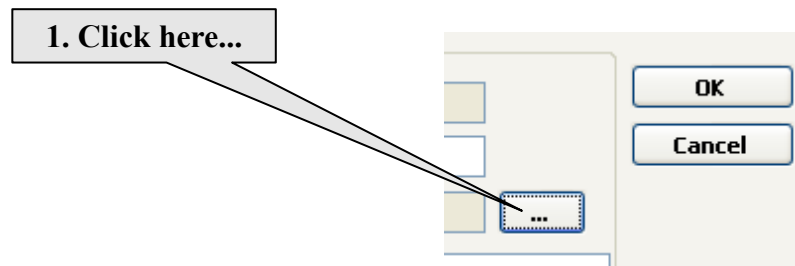

Avaya IP Phones will get the Page Announcement

If you want to access External Page at the same time, add its extension here...

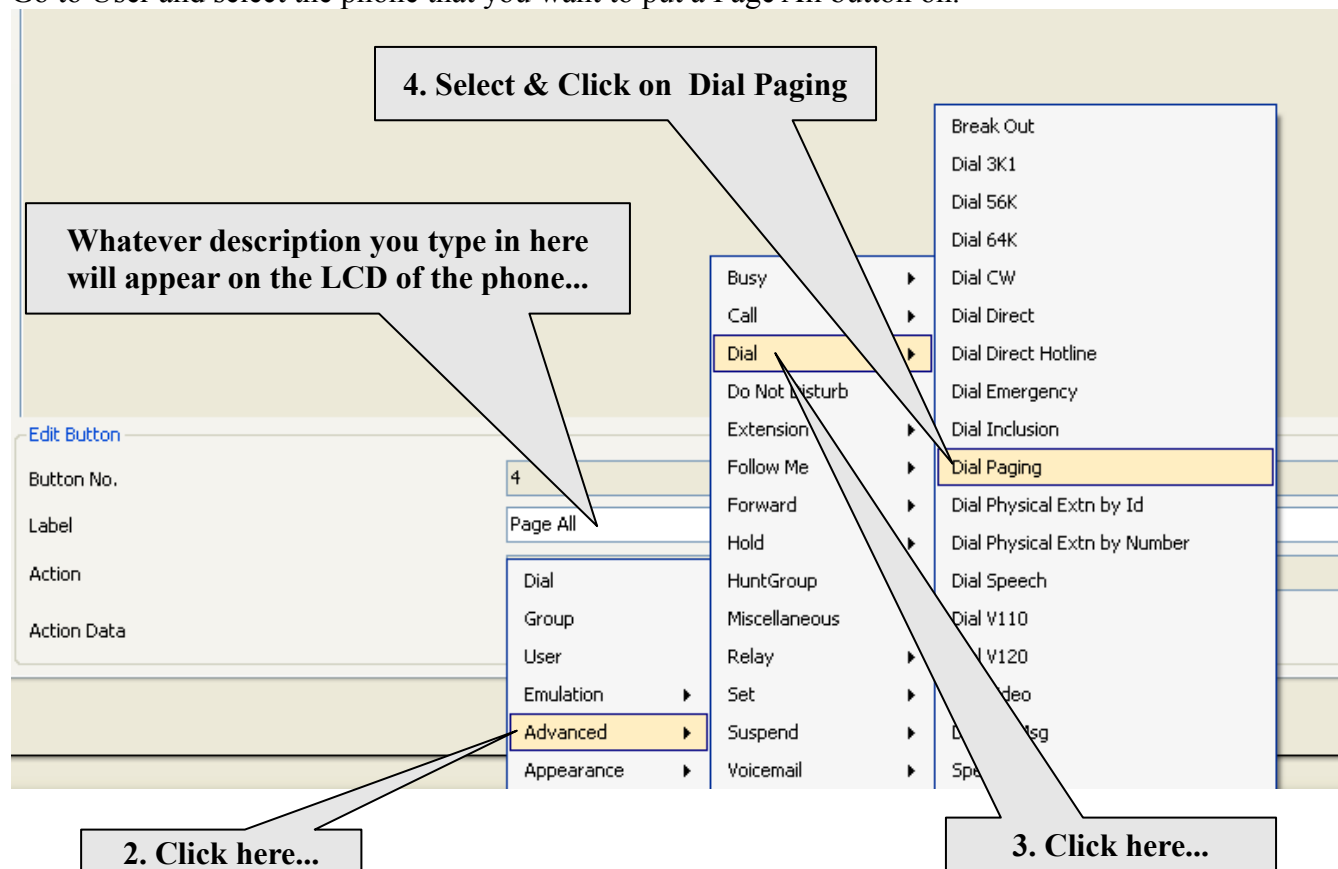

IP Office Essential Edition

Put a Page All button on the phone(s)

This is done from the Button Programming tab....

Go to User and select the phone that you want to put a Page All button on.

IP Office Essential Edition

Page All

Telquest Tech Support

It should look something like this:

Select the Page All that you created earlier

Edit Button

Button No.

4

Label

Page All

Action

Dial Paging

Action Data

275 Page All

When you view the Users Button Programming, it will look something look this:

Operator: 0*

User

Voicemail

DND

ShortCodes

Source Numbers

Telephony

Forwarding

Dial In

Voice Recording

Button Programming

Button ...	Label	Action	Action Data
1		Appearance	a=
2		Appearance	b=
3		Appearance	c=
4	Page All	Dial Paging	275

This Tab...

If you want a “Dial All Page Access Code” that can be dialed from any telephone, you can create new Short Code to do that,

Create a New Short Code:

Here we use *799, but you can use another if you like.

Select this...

799: Dial Paging

Short Code

Code	<input type="text" value="*799"/>
Feature	<input type="text" value="Dial Paging"/> ▼
Telephone Number	<input type="text" value="275"/>
Line Group Id	<input type="text" value="0"/> ▼
Locale	<input type="text"/> ▼
Force Account Code	<input type="checkbox"/>

Enter the Page All Hunt Group number here...

Now go to any telephone, dial *799 (STAR 7 9 9) and you will be able to Page All idle telephones that are in Page Group (Hunt Group) 275.
