

Put the Public IP Address of the KSU here

The screenshot shows a configuration window titled "System" on the left and "Demo w Licenses" on the right. The "System" pane contains a "Name" field with the value "Demo w Licenses". The "Demo w Licenses" pane has a series of tabs: System, LAN1, LAN2, DNS, Voicemail, Telephony, Directory Services, System Events, SMTP, SMDR, Twinning, VCM, and CCR. Below these is a sub-tabbed area with "LAN Settings", "VoIP", "Network Topology", and "SIP Registrar". The "SIP Registrar" tab is active, showing the following fields:

- Domain Name: 71.233.229.11
- Layer 4 Protocol: Both TCP & UDP
- TCP Port: 5060
- UDP Port: 5060
- Challenge Expiry Time (secs): 10
- Auto-create Extn/User: ☒

A blue callout arrow points from the text "Put the Public IP Address of the KSU here" to the "Domain Name" field.
