

# Avaya IP Office Standard Mode Release 9.0.5 and higher 911 Email/Text Message Notification

## Set Up Notification

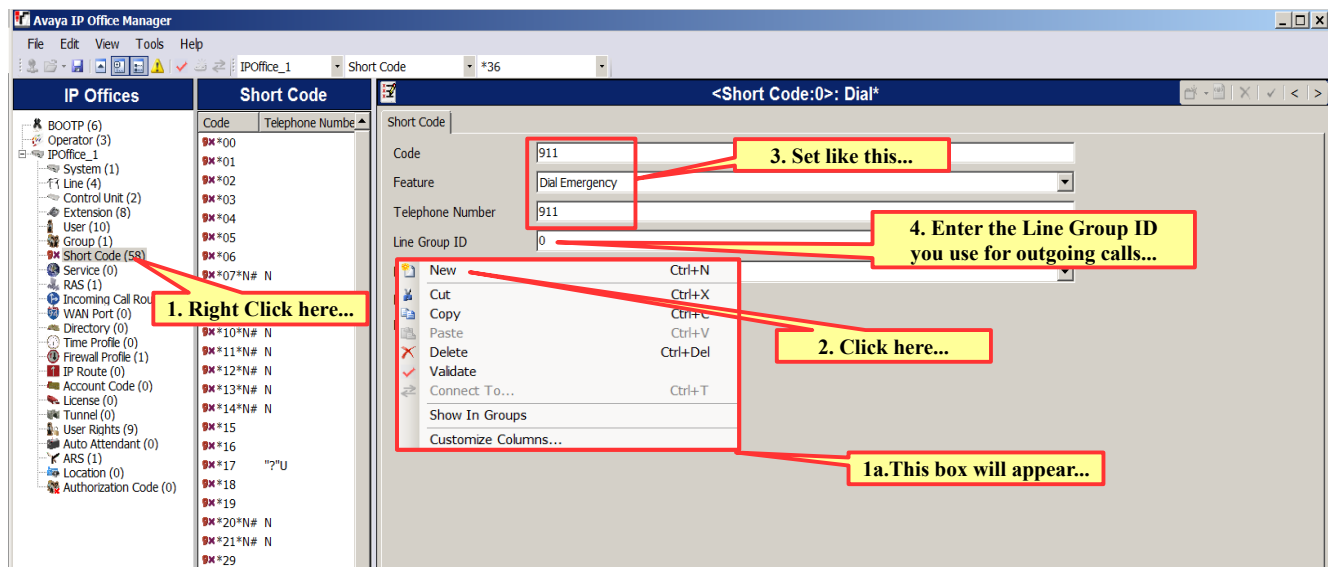

## Set Up Email

This is set up info using Gmail.com

## Set Up Short Code for Dial Emergency

**Remember, you must have the LAN Port of the KSU connected to the customers LAN.**

**You must create an IP Route to reach the Internet.**

## What info does the Email notification provide?

**It gives basic info.**

**It says "Emergency Call"**

**Location (Does not work)**

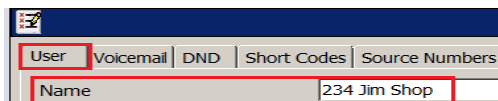

**The number called (911 in this example)**

**Caller: "The extension number"**

**Usr: "The Extension Number and Name" Example: 234 Jim Shop**

**Note: The "Usr;" can provide the best info to locate the persons location that called 911.**

**The User is limited to 15 characters and spaces.**

User	Voicemail	DND	Short Codes	Source Numbers
Name 234 Jim Shop				

It is supposed to also give the location of the phone, but I tried and it did not work with Release 9.1.12.
