

Avaya IPO Essential Edition

Short Codes & VM Access

Telquest Tech Support

If you want to have access to another Stations or Hunt Groups VM then add a Short Code.

Use a code like : *99 (you can create any available Short Code)

Code	*99
Feature	VoicemailCollect
Telephone Number	“?” --->>> Don't forget to put the Quotation Marks in.
Line Group ID:	0

You can then dial the short code from any telephone and have access to that mailbox.

You can also add it as a Direct Dial Button on your phone.
