Sending a caller from a Mailbox to a call phone.

Ok go to the users mailbox in vmpro (user->leave mail)
Put in a menu action and enable options 0,2 and a timeout

Then put in 2 transfer actions.
Enter the numbers in there and connect them to the right option.
For the time out make a voice question and record the greeting and put in a second greeting and enter "en/mc_00.wav"
Then press on the little microphone and enter the time that the message can be (record time for the caller)
Then save an make live
Of course record the greeting for all three options in the menu.
