Panasonic KX=TDA-50 Key Service Unit
Activate External Music Input
Telquest Tech Support

By default, the KX-TDA-50 telephone System uses the Internal Music player.

You can change it to use an External player.

Programming procedure:

Go to Extension 101

Leave the handset in the cradle

Press the **PROG** button below the LCD

LCD says **Program No?->**

Dial * # 1234 (Star Pound 1 2 3 4)

LCD says **Sys-Pgm No?->**

Dial 711

Press the **ENTER button**

The LCD will say
711
Music On Hold

Press the **ENTER** button

Press the **SEL+** button until you see **BGM1** in the LCD

Press the **Auto Dial/Store** button

Pick up and hang up the handset
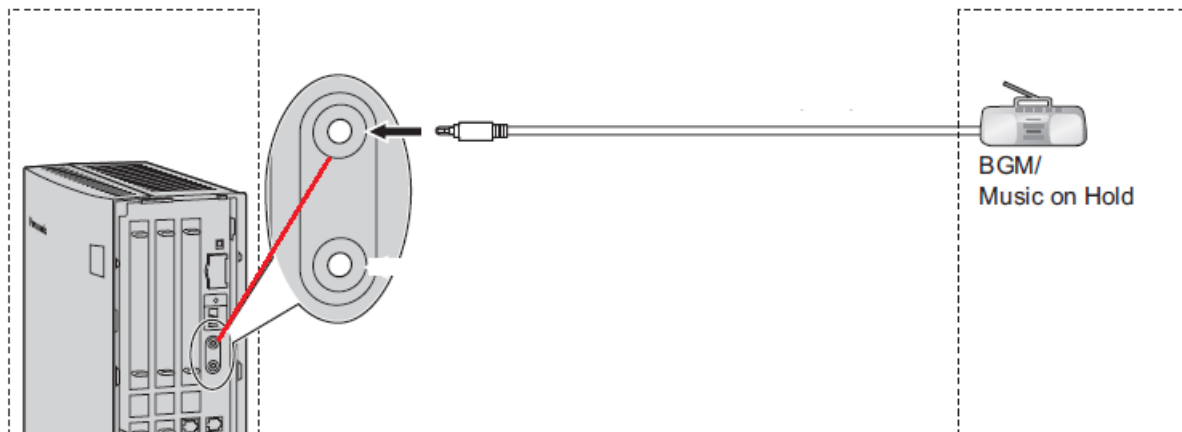

Be sure to use the correct type of Plug.
It should be the same on both ends of your cord.
If you use the Incorrect Plug, you may only get 1 channel of the players audio.

Correct Plug
1 black band..

Incorrect Plug
2 black bands..

Here is where you plug it into the KX-TDA-50 Telephone System

BGM/
Music on Hold

Now your external Played should be played to callers that are On Hold.
