# Panasonic KXTDE / NCP Systems
# 3rd Party SIP Phone Info
# Telquest Tech Support

## Here are the facts concerning this:

You can use a 3rd Party SIP Phone with the KSU as long as it is on the same physical network as the KSU.

You can also use a 3rd Party SIP Phone at a remote location as long as a VPN is setup between it and the KSU.

You can program a 3rd Party SIP Phone to connect/register to the KSU from a remote location without a VPN but it will be rejected with a SIP "Forbidden" message.

If you want to use an Apple Iphone or equivalent Smart Phone, the SIP Client/App. you choose must have a VPN option.

You will also need a VPN Router at the KSU location as well.

This holds true if you are using Panasonic "NT Type" IP Phones as well.
