

Panasonic KX-NS700 System Reset Telquest Tech Support

The KSU will now take about 2 1/2 minutes to Reset/Reboot.

All calls will be disconnected.

It will return you to the login screen.

The login screen for the 'Web Maintenance Console' features a blue header with the Telquest logo. Below the header, there are input fields for 'Username' (containing 'INSTALLER') and 'Password' (masked with dots). A 'Login' button is positioned at the bottom right of the form.
