

Panasonic KX-NS700 Alarm/Error/Log Reset Telquest Tech Support

If the STATUS LED on the KSU is Red, then there is an Alarm/Error in the system.

It is usually just a power failure alarm.

Here is how to see what the Alarm/Error is and how to clear it.

Log into the Web Maintenance Console.

Then...

1. Click Here...

NS700 Web Maintenance Console

Login as INSTALLER

5/4/2017

2. Click Here...

3. Click Here...

4. Click Here...

5. Click Here...

6. Click Here...

7. Click Here...

Index	Date	Time	Error Code	Sub Code	Error Message
1	04/04/2017	11:28:34	365	*10103	SIP Server connection was disconnected
2	04/04/2017	11:28:25	391	*10105	Data Link established
3	04/04/2017	11:28:25	391	*10102	Data Link established
4	04/04/2017	11:28:25	391	*10101	Data Link established
5	04/04/2017	11:28:11	2	10000	System Restart
6	04/04/2017	11:25:59	10	10000	Incorrect AC shut down

Step 5 will let you see the Minor Alarms

You can also click on Major to see any alarms in there.

Step 6 will clear the alarms in one area at a time.
