1. Click here...

2. Click here...

3. Click here...

4. Click here and select 80...

5. Scroll down to 64...

6. Set to Enable...

Note:

I have omitted instructions to click the “OK” button.

It is understood that you know to do it each time to save your changes to the KSU.

Operation:

Press the Day/Night button and it will alternate between Day Mode and Night Mode.

The LCD on the phone will display the set mode for about 5 seconds.

When in the Night Mode, the buttons LED will be lit steady red.

You can go to any phone and press the “INFO” button several times and it will also display the current mode the KSU is using.
