

## Panasonic NS-700

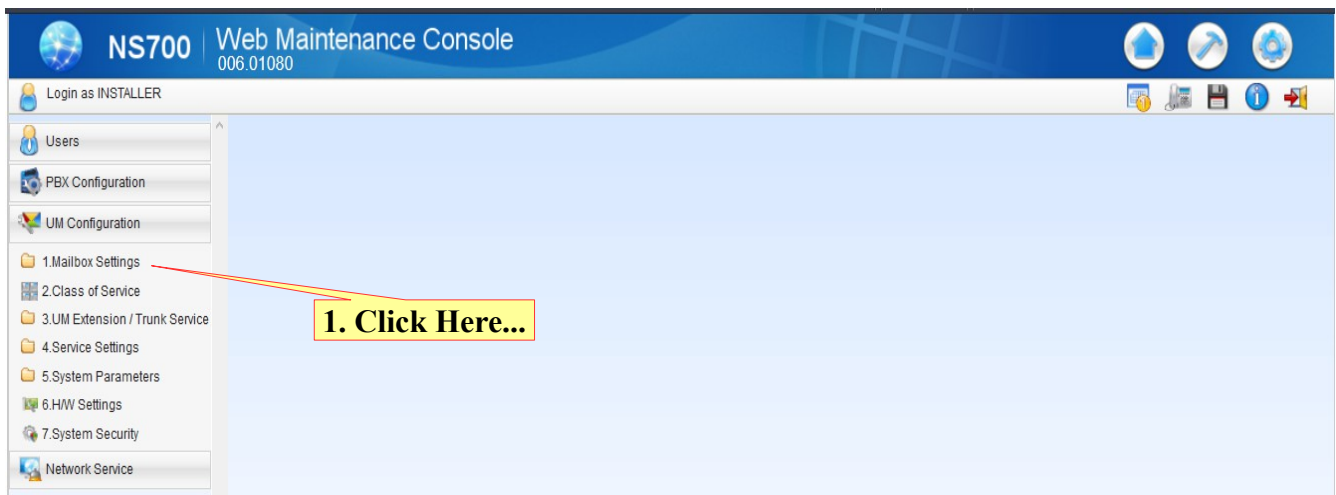

### Administer Mailbox Passwords

### Telquest Tech Support

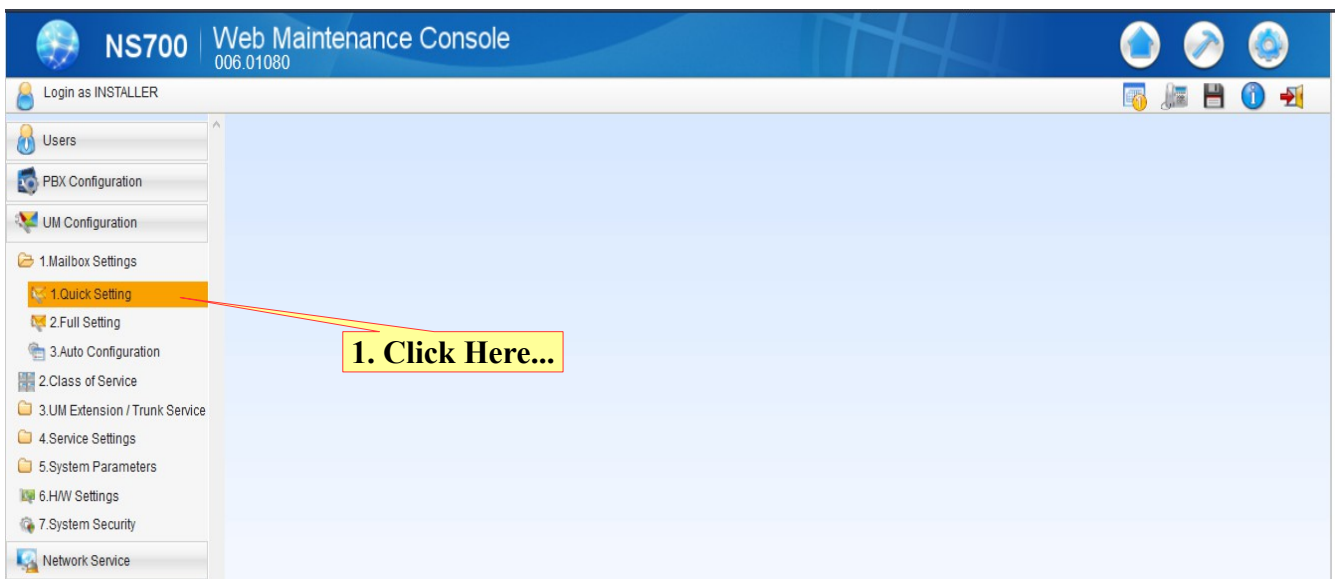

This Help Sheet explains how to change the password for a mailbox.

In this example, I will be changing the Password for Extension 101.

When entering a new password, please do not use 1234 or anything simple.

You are only making it too easy for hackers to get into your system and cause problems.

**When you are done changing any extensions password, call into the Voice Mail System and test it.**

**To Test:**

**Go to the phone/extension that you changed the Password.**

**Press the Intercom button and dial 500.**

**The Voice Mail System will ask you for the password.**

**If the new Password is accepted, you are done.**

**If it is not accepted, go through the Help Sheets again and do it over.**
