

# Panasonic KX-NS700 Enable Manager Mailboxes Telquest Tech Support

1. Click Here...

The screenshot shows the 'System Security' configuration page in the NS700 Web Maintenance Console. The left sidebar contains a tree view with 'UM Configuration' and '7. System Security' highlighted. The main content area has two tabs: 'Manager' (selected) and 'Subscriber'. Under the 'Manager' tab, there are four sections, each with an 'Enable' dropdown menu and a 'Click To Edit..' button. The first section is 'System Manager Access from Telephone' with a dropdown set to '3'. The second section is 'Password for System Manager (Up to 16 numeric digits)'. The third section is 'Message Manager Access from Telephone' with a dropdown set to 'Enable'. The fourth section is 'Password for Message Manager (Up to 16 numeric digits)'. A red box highlights the 'Enable' dropdowns for the second and third sections. Red arrows point from the text 'Enable these Manager Mailboxes and assign STRONG Passwords' to these dropdowns. At the bottom right, there are 'OK', 'Cancel', and 'Apply' buttons.

**Enable these Manager Mailboxes and assign STRONG Passwords**
